

DYSTOPIAN NIGHTS 2023

“Dystopian Nights” has been thriving in the Copenhagen underground scene for the past three years. It offers a unique show that blends contemporary music, improvisation, harsh noise, electronic music, and more into an inclusive and unexpected evening of art. Dystopian welcomes all styles, inspirations, and art forms that may not have a platform to be displayed and that are unusual or outside the mainstream. It is a show for innovative, dynamic individuals who do not belong to a specific category and who push the boundaries of traditional art forms. But especially, Dystopian is a community of people before artists who work together to realize a common goal with no compromises, enjoying every moment along the way. We are always in search of new artists to perform at our events, and we are open to every alternative project regardless of age, social background, and gender. Throughout the year, “Dystopian Nights” has collaborated with other alternative local realities such as NoFigure, SuperNoise, Absolute Music, PRIMI, The Community, and others, creating a network for forward-thinking creative individuals and art enthusiasts. Dystopian showcases high-level music and interdisciplinary art forms, including audiovisual and performance art. This year, our team of enthusiastic volunteers aims to celebrate our activity and the network we have created by organizing our monthly event in six different locations throughout the heart of Copenhagen. We are excited to be a part of an ambitious itinerary project that connects different focal points of our town.

The doors open at 20.30, concerts start 21.00. On each night there will be 4 acts, and the entrance fee is 50 dkk; The evening will end around 1 pm.
