Computer Lars says it -

"men så begyndte jeg at skrive..."

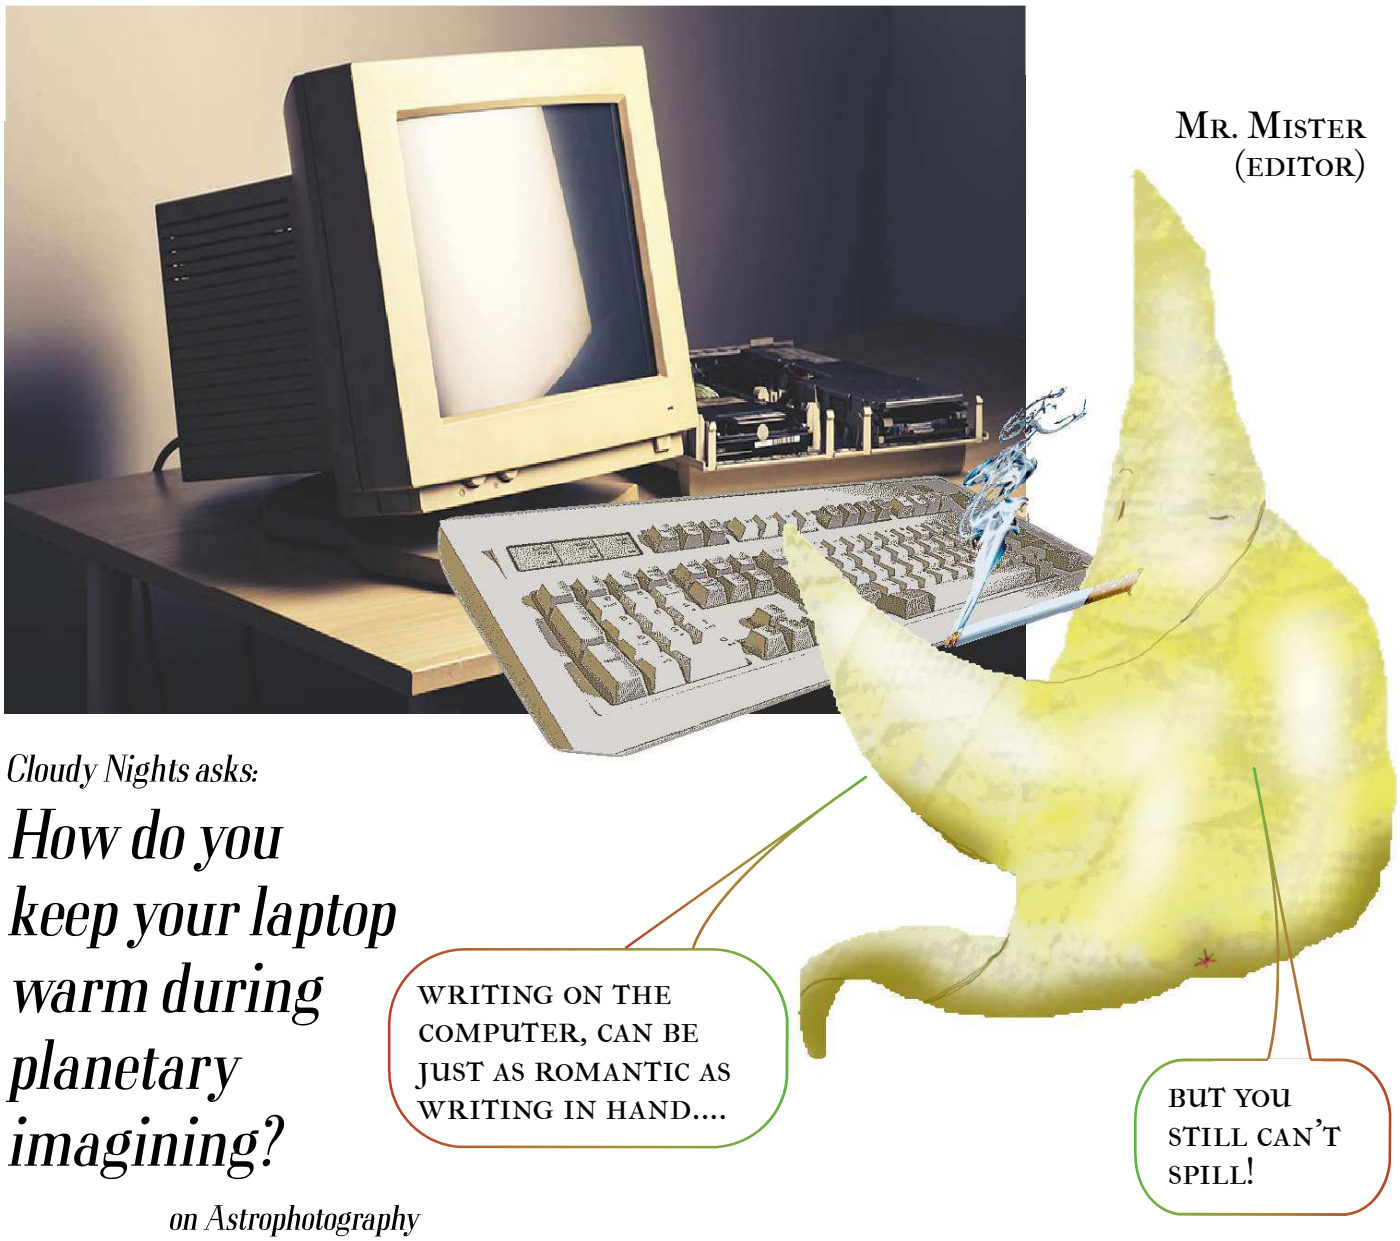
what Proust meant exactly

I lang tid gik jeg tidligt i seng. I lang tid lagde jeg mig i seng på et tidligt tidspunkt ...'Men så begyndte jeg at skrive', 'aller au lit' / 'je vais/vait au lit'...

Longtemps er habituel og følgrs normalt af passe simple, men Proust bruger her passe composé – eneste brug i romanen. Present past tense / tendu / pere tendu – noget om tense og tendu og titlen

Det kan man demonstrere ved at sætte et neuralt netværk i gang med at oversætte Proust. En sådan skal lære mere end de ord, som der står i Recherche. Det kræver en forståelse af det tyvende århundredes franske samfund og liv samt en viden om Prousts interesser, hvis man skal oversætte en sætning som

Je voulais poser le volume que je croyais avoir encore dans les mains et souffler ma lumière til det korrekte Jeg ville lægge bogen, som jeg troede jeg stadig holdt i hånden, fra mig og puste lyset ud. Hvis man ikke ved, at man dengang brugte stearinlys som læselampe, kunne man nemlig skrive Jeg havde lyst til at lægge den lydstyrke, som jeg troede, jeg stadig havde i hænderne, og blæse mit lys ud.



MR. MISTER
(EDITOR)

Cloudy Nights asks:

How do you keep your laptop warm during planetary imaging?

on Astrophotography

David Ridge:
Hey all, happy holidays. Never have I had this problem - until observing in 30F degree weather

. But now I'm using my HP Pavilion to control my permanently mounted scope located 15' from my kitchen door. HP tells me their laptops may have difficulty running in such low temperatures (in fact, I've suspected such issues on a couple of occasions). Of course, I'm using USB connections but I'm uncertain that camera and mount controls will work with 20' of USB cabling. Has anyone solved the cold environment issue for their laptop "controllers"?

S i l e n t _ L i g h t :
I keep mine in an insulated bag, it keeps itself warm. Been out at 12 deg with it

So please, enjoy this magazine, for better or worse!

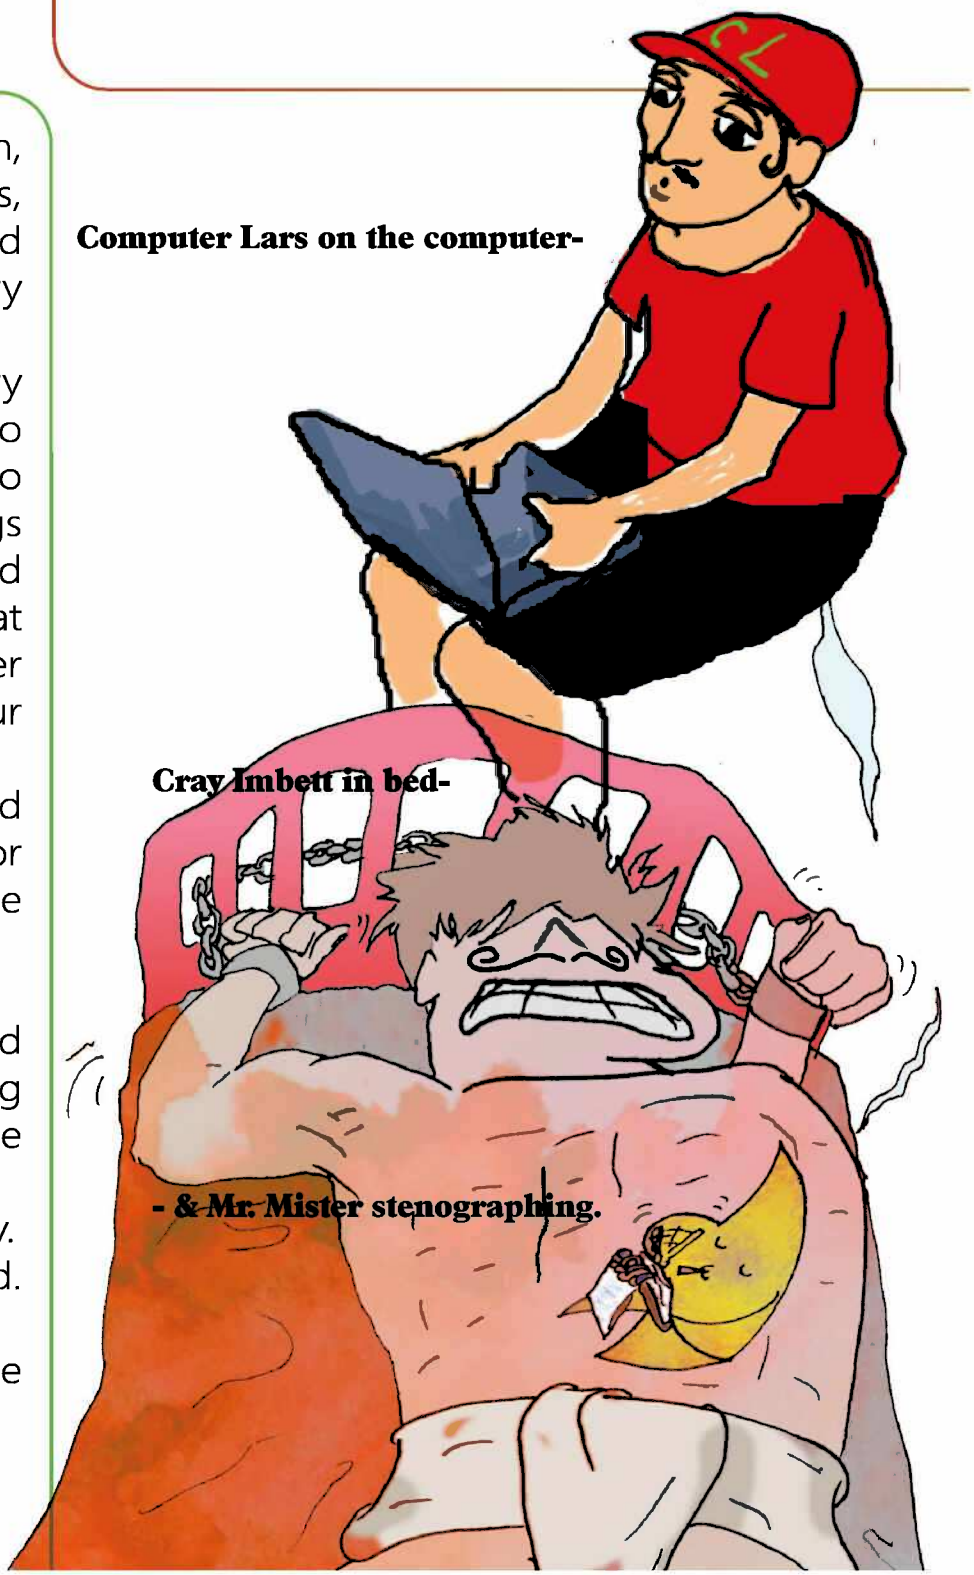
Leder –

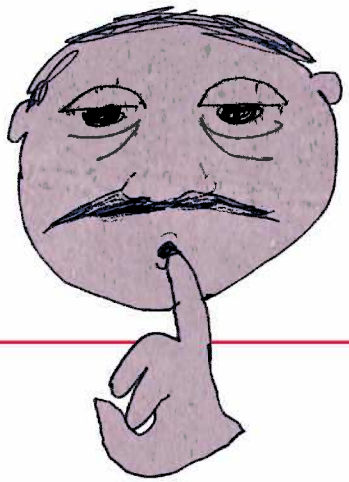
If you are feeling down, please, read my thoughts, me, Cray Imbett, deduced and written by your very own Mr. Mister.
Me and my secretary Mr. Mister would like to remind you (we nod to each other) that things could be worse. You could be realising *right now* that you could not and never was able to save your crumbling marriage.
You could be trapped inside a soul vessel, for example an intricate piece of glass.

You could have an old piece of fruit manifesting under your butt everytime you try to sit down.
You could be in university.
you could be unemployed.
You could have a job.
It could basically all be worse than it is.



Joke

My boss calls me "the computer".
- Why?
- because I go to sleep when left unattended for 15 minutes.



Death in a bed

Man Ray photographed Marcel Proust in his bed, two days after his death. Man Ray didn't know Marcel Proust, but they had friends in common - they did not have internet back then, so "give my regards" and "tell him/her I say hi" were the text messages of the time.

Citatsøjle

"Puns demonstrate langauge's fundamental urge to never get to the point. Words copulate, while puns reproduce."
- Samuell Beckett, on Perec's Wishes

"Fucking your bitch like I'm going to war"
JPEGMafia, "NEMO!"

"Nogengang' er jeg opp' // nogengang' er jeg ned' // men i nat baby // er jeg på dig lissom prikker på en leopard"
- Nik & Jay, "Fest"
