Kort projektbeskrivelse som forelægges udvalget uredigeret
PARK is an exhibition of outdoor work in and around AGA Works, from September - October 2021. The project is one of the final possible at the site, in the 3 large parking areas in the space around the buildings. The artists will use the surrounding built environment, structures, visual elements, surfaces, materials, history and future as starting points for a series of large-scale outdoor works in an industrial space of 'transport', for temporary pause and future departure, loading and unloading.

Formidling af projektet
We will invite widely through local media, radio, schools and listing sites and to the large audience who have shown interest in our previous projects. Marketing will also take place digitally on websites, social media and AGA Works broad network, as well as through the building's artists' channels. We want to make a poster for the exhibition to make it more visible to the local audience. There will be invitations to local residents and businesses through local newspapers and invitations to our large network in the area, both from previous projects carried out in the area (including Tørreloft & Kiosk 7) as well as personal contacts. It will also be documented and publicized, both in Denmark and through international contacts to create connections between the local and international, for future development.
