**Emne:** RE: Evaluation of High tea between the trees

Dear Christian,

I realise I owe you these answers:

- The target group of the activity

Inner city residents, Policy makers, Beboer foreningen

- How did the activity go?

Thankfully very well. It was well attended and managed to get both press and focus on the problem from the residents and foreninger. As a result the issue was addressed to the vice chief of police at the SBB as I understand. The event also connected the local community of residents and businesses. There are plans of future street events such as xmas market etc.

- Any changes compared to what was planned?

No.

- How has the activity been communicated?

Local newspapers, News websites, Facebook groups, printed flyers and word of mouth.

- Which activities were performed and what results were created:

Street closure and public open picnic. Signed petition of 60+ People to support the cause of number-plate camera restrictions of traffic in middelalderbyen.

- How many people participated in the activity?

Approximately 80

- What could be done better?

More political attendees.

Med venlig hilsen / Best regards

**Enlai Hooi**
